

Art.-No.:6.6800.0020

6800

## Cleaner for WB Paints

### Characteristics

4CR 6800 is a colour detergent for water based colours and varnish (acrylic or emulsion paints and others), which was developed for the usage in spray gun cleaning machinery. 6800 develops almost no foam and dissolves colour, varnish, grease and dirt adhesions from all metal and plastic materials. It also dissolves water based colours and varnish which started to dry.

### Tech Tip

Only 100 ml of cleaning thinner is needed per spay gun.

### Application

The usage should be undiluted and in a circulation principle, preferable executed in expected washing machinery.

Due to the fact of its good dissolving qualities, the product can be used in different work areas; for example the manual cleaning of the above mentioned work field or it can be used in an immersion bath, cold or also hot until about 60°C.

Nitro and cellulose varnish will not be harmed, but they could be softened or grained after a long appealing (If necessary please test it before using).

### Technical Data

ADR	no dangerous goods
-----	--------------------

### Storage and Transportation

Keep dry an frost-protected. In tightly closed original containers at least 12 months shelf life.
